

Disclaimer:

Greenspec produces hardware and software for the regulation of greenhouse installations. Greenspec gives a warranty for the hardware in case of malfunctioning within 12 months.

The use of the Greenspec products requires careful installation and setting of all parameters. Greenspec itself does not execute the installation.

We supply according to the general conditions according to the FHI, as can be found on our website.

The good growth of crops in a greenhouse depend on the settings of the right conditions, in part regulated by the Greentech software and hardware. Greenspec is not responsible for the possible damage as consequence of wrong settings of the regulation that is not suitable for the crop.

We strongly advise end clients to check with the installer that the right alarm functions are set to prevent malfunctions. We supply several options to transmit the alarms to the attention of the end client, we strongly advise end clients to check with the installer that the right methods for the transmission of the alarms are set.

It is the responsibility of the end client to check that the alarms and the transmission of alarms are active. Greenspec is not responsible for the possible damage as consequence of not setting the correct alarm values and the malfunctioning of the set-up of the alarm transmission.
